EXPERIENCE

AI Engineer Intern | *Docy AI, Sydney, NSW* ✉

Nov 2025 - Jan 2026

- Designed and built 3 production-ready agentic workflows for financial and accounting use cases, integrating LLM APIs and document data extraction to automate validation, aggregation, and audit-ready outputs, reducing manual processing and review effort by 7%.
- Tested and deployed features across development and staging environments, monitoring errors, latency, and API performance for systems handling hundreds-low thousands of requests per week, ensuring stability and consistency prior to release.

Research Assistant | *University of New South Wales, Sydney, NSW* ✉

Sep 2025 - Present

- Utilised MATLAB to analyse financial model performance, identifying critical parameters and behavioural patterns that enhanced model interpretability and informed data-driven decision-making.

Data Analyst Intern | *KPay Group, Sydney, NSW* ✉

May 2025 - Oct 2025

- Leveraged Python and PowerBI to clean, analyse and visualise 70,000+ real-time records across 300+ categories, identifying and building reports on optimal industries and time windows for outreach, driving higher conversion efficiency by 12%.
- Developed and integrated an AI-powered automation tool that streamlined HR data processing and delivered analysis-ready workforce dashboards, reducing manual reporting and enabling data-driven decisions on staffing and resource allocation.

Product Analyst Intern | *The W Solutions, Sydney, NSW* ✉

Feb 2024 - Jun 2024

- Executed SQL queries via Azure and manipulated large wealth management datasets to analyse prevalent asset types, driving business requirement refinements that improved 15% efficiency in data handling and reporting.
- Collaborated with cross-functional team of 5 on product planning, market research, and data visualisation to inform UI/UX roadmaps and prioritise features, accelerating stakeholder approval and reducing development iterations.

EDUCATION

UNIVERSITY OF SYDNEY

Sydney, NSW

Master of Commerce | *Data Analytics for Business*

2025 - 2026

- Student Representative for CSYS5040: Criticality in Dynamical Systems | Business School Postgraduate Peer Mentor S1, 2026.
- 3rd place in Make a Real Difference (MARD) Competition 2025.

Bachelor of Commerce | *Business Information Systems & Data Science*

2022 - 2025

- Ranked 4th in Data Structures and Algorithms (90) | Ranked 7th in Data Governance and Technology Assurance (75).
- 2nd place in Microsoft x USyd Case Competition 2024 (*invited to Microsoft HQ*) | 4th place in UAVS Hackathon 2023.

PROJECTS

Optiver Volatility Prediction Modeling - Data Science Research Project

- Processed ultra-high-frequency financial data from 120+ stocks, applying advanced time series models (GARCH(1,1)-family) to forecast future stock volatility, achieving a 16% reduction in prediction error over benchmark models.
- Built an interactive Shiny app to visualise volatility predictions, utilising confidence intervals and interactive plots, enhancing model transparency by 54% and facilitating real-time decision-making for traders.

MentAlly - Mental Health Support Application for Vietnamese High School Students

- Designed self-assessment tools using Figma and integrated an AI chat assistant to improve accessibility and high levels of user engagement in mental well-being, achieving 88% positive user feedback from 150+ students during beta testing.

LEADERSHIP & ACTIVITIES

Vice President | *The United Association of Vietnamese Students in New South Wales (UAVS-NSW)*

Mar 2023 - Present

- Led a cross-functional team of 60+, overseeing internal operations and external stakeholder engagement, securing \$50,000+ in annual sponsorships to deliver cultural and professional events for 10,000+ in participant-based.
- Developed a centralised dashboard using Excel to track sponsorship contributions and event success metrics, improving reporting accuracy by 47% and providing real-time insights to enhance sponsor retention and drive organisational growth.

Design Subcommittee | *Business Information Systems Association (USYD-BISA)*

Mar 2024 - Nov 2024

- Designed visually appealing and user-friendly graphics for events, social media, and promotional materials using Adobe Illustrator and Canva, enhancing target audience engagement by 9% across multiple social media platforms.

SKILLS

Skills: Python (*pandas, numpy, matplotlib, sklearn*), SQL, R, LaTeX, Data Modeling (*BPMN, ERD, Star Schema*), Predictive Modeling.

Tools: PowerBI, Tableau | PostgreSQL, Databricks | Azure, SAP, Salesforce | n8n | Git, GitHub | Figma, Canva, Adobe Illustrator.

PM Platforms: Microsoft Office (*Word, Excel, Powerpoint, Outlook*), Trello, Lark, Jira, Monday.com.
